Selenium Test-4

1. write the possible cssSelector and x path for following.

```
<span>
<div>
<ol>
<li id = 'choice' class = "opt" > fruits </li>
</ol>
</div>
</span>
```

Ans- Using ID - #usernaame choise
class name - .opt
using tag name and ID - li #usernaame choice
using ID attribute - li [id = 'choise']

2. write possible Css Selectors and x path for the following.

```
<div>
<div>
<input type = "button" class = "btn" id = 'ok' />
</div>
</div>
```

Ans- using ID - #button
class name - .btn
using tagname - input type #button
using ID attribute - ~~input type [id = "button"]~~
- input type ["ok" = "button"]

3. write a Selenium program for login page (use css selector to find elements

eg: https://www.irctc.com

It has username field, password field and login button

```
<div>
  <input class = 'cred" placeholder = "username"/>
<Input class = "cred" placeholder = "password"/>
<Input type = "button" class = "cred" name = "Login"
value = "Login">
</div>
```

Ans:-

```
Import org.openqa.selenium.By;
Import org.openqa.selenium.webDriver;
Import org.openqa.selenium.WebElement;
Import org.openqa.selenium.chrome.ChromeDriver;

public class loginpage{
    public static void main (String[] args){

webDriver.driver = new ChromeDriver();
driver.get("https://www.irctc.com");
webElement element = driver.findElement
(By.CssSelector(#"username"));
web Element element = driver.find Element
(By.cssSelector(#"login"));
web Element element = driver.find Element
(By.cssSelector(#"password"));

}

}
```
